SELCO's Earth Day Farmers' Market

SELCO's Earth Day Farmers' Market was a success! We want to thank the hundreds of residents that came by to check out the market. While the weather forced us to shut down early, it was an amazing turnout for the first 2 hours.

A big thank you to all of our vendors as well, we wouldn't have been able to put this together without you. Hopefully next year is a bit sunnier!

Remember to check out the Shrewsbury Farmers' Market this summer. They begin their season on June 15th! Visit ShrewsburyFarmersMarket.com for more information.

(L-R) Dan Sieger (Assistant Secretary for Environment), John Lebeaux (Commissioner, Dept. of Agricultural Resources), Michael Hale (General Manager, SELCO), Matt Beaton (Secretary, Energy and Environmental Affairs)

Energy Saving Cooling Tips

Summer is right around the corner! Thinking of buying a new air conditioner? The decision on which air conditioner to buy is important. Here are some energy saving tips for cooling your house this summer that will help save you money on your electric bill.

Replacing an existing air conditioner.

Energy Star recommends replacing your air conditioner if it is more than 10 years old with an ENERGY STAR qualified model. This could cut your cooling costs upwards of 20%.

What size air conditioner should I get?

A bigger air conditioner is not always better. People buy bigger air conditioners believing it will provide better cooling. Air conditioners remove both heat and humidity from the air. A bigger unit will remove the heat, cooling the room quickly, but not the humidity and will leave a damp, clammy feeling in the room. A properly sized unit will remove the heat and humidity efficiently and effectively. Estimate 20 BTUs per square foot of living space when purchasing a new air conditioner and look for the ENERGY STAR logo!

For a complete list of all Energy Star certified air conditioners as well as other energy saving tips, buying guides and product specifications, please go to www.energystar.gov/roomac
